

SiteWorx **Tune**

Optimize lighting and reduce energy use —
with maximum control and automation

We Generate Facility Wellness

We Generate Facility Wellness

We call our innovative approach to keeping your facility operating at peak efficiency

Facility Wellness.

Facility Wellness means that your facility is operating at peak efficiency, with no surprises. It ensures that vital equipment is monitored constantly and automatically so that it stays up and running. It enables proactive maintenance, not emergency repairs and downtime. It keeps the work environment safe for people and sustainable for the environment. And it gives your managers clear visibility into their entire operation by putting important metrics at their fingertips — instantly, automatically, and remotely. By knowing more, these managers can make better decisions, spot issues before they happen, and reduce consumption of limited resources.

That's Facility Wellness. Our SiteWorx suite of applications makes it happen, every shift, every day.

Transform Your Lighting with SiteWorx Tune

Bright, reliable lighting is critical at all facilities — from warehouses to manufacturing centers. But it can be much, much more. The SiteWorx Tune lighting control application transforms lighting from a necessity into a source of new possibilities:

- **Deliver intelligent lighting control**
- **Maximize energy savings**
- **Improve productivity**
- **Maintain a safe and comfortable work environment**

Intelligent Lighting and Control Application

SiteWorx Tune is an intelligent lighting control application that uses smart sensors and advanced, cloud-based software to maximize energy savings, improve productivity, and maintain safe, comfortable light levels. It brings new levels of control, automation, and savings to your facility's lighting infrastructure. With SiteWorx Tune, you can stay informed of energy use via its intuitive dashboard, which displays real-time energy use and savings data.

The result? Constant, convenient control by:

- Facility/plant managers
- Environmental, health and safety (EHS) managers

With SiteWorx Tune, you can maximize the efficiency of your lighting, while ensuring that your workplace is safe and sustainable. Bring new automation to your facility today and even more capabilities in the future. All with SiteWorx Tune — intelligent lighting control made simple.

What Can SiteWorx Tune Do For You?

A wide range of facilities — heavy manufacturing, food and beverage, cold storage, and more — rely on SiteWorx Tune to:

Save Money

- **Cut energy costs** by switching to Lightelligence-enabled luminaires and combining them with powerful, automated lighting controls
- **Automate lighting controls** to deliver an impressive, fast ROI

Create a Comfortable, Productive Environment

- **Empower** building managers and occupants with constant, convenient control
- **Schedule and automate setbacks** by implementing multi-strategy controls, quickly and easily, and get control over workplaces, including keypads that adjust lighting with the touch of a button

Automate Facility Lighting

- **Ensure the right light**, always, with built-in automation
- **Requires less time and effort** from facilities personnel

Meet Sustainability Goals

- **Accurate collection and documentation of lighting-related energy use** lets you validate savings for utility rebates and meet sustainability goals

Achieve Compliance

- **Meet the rigorous standards** of Title 24, 2018 IECC, UL924, NFPA 101, and more

Ensure Safety

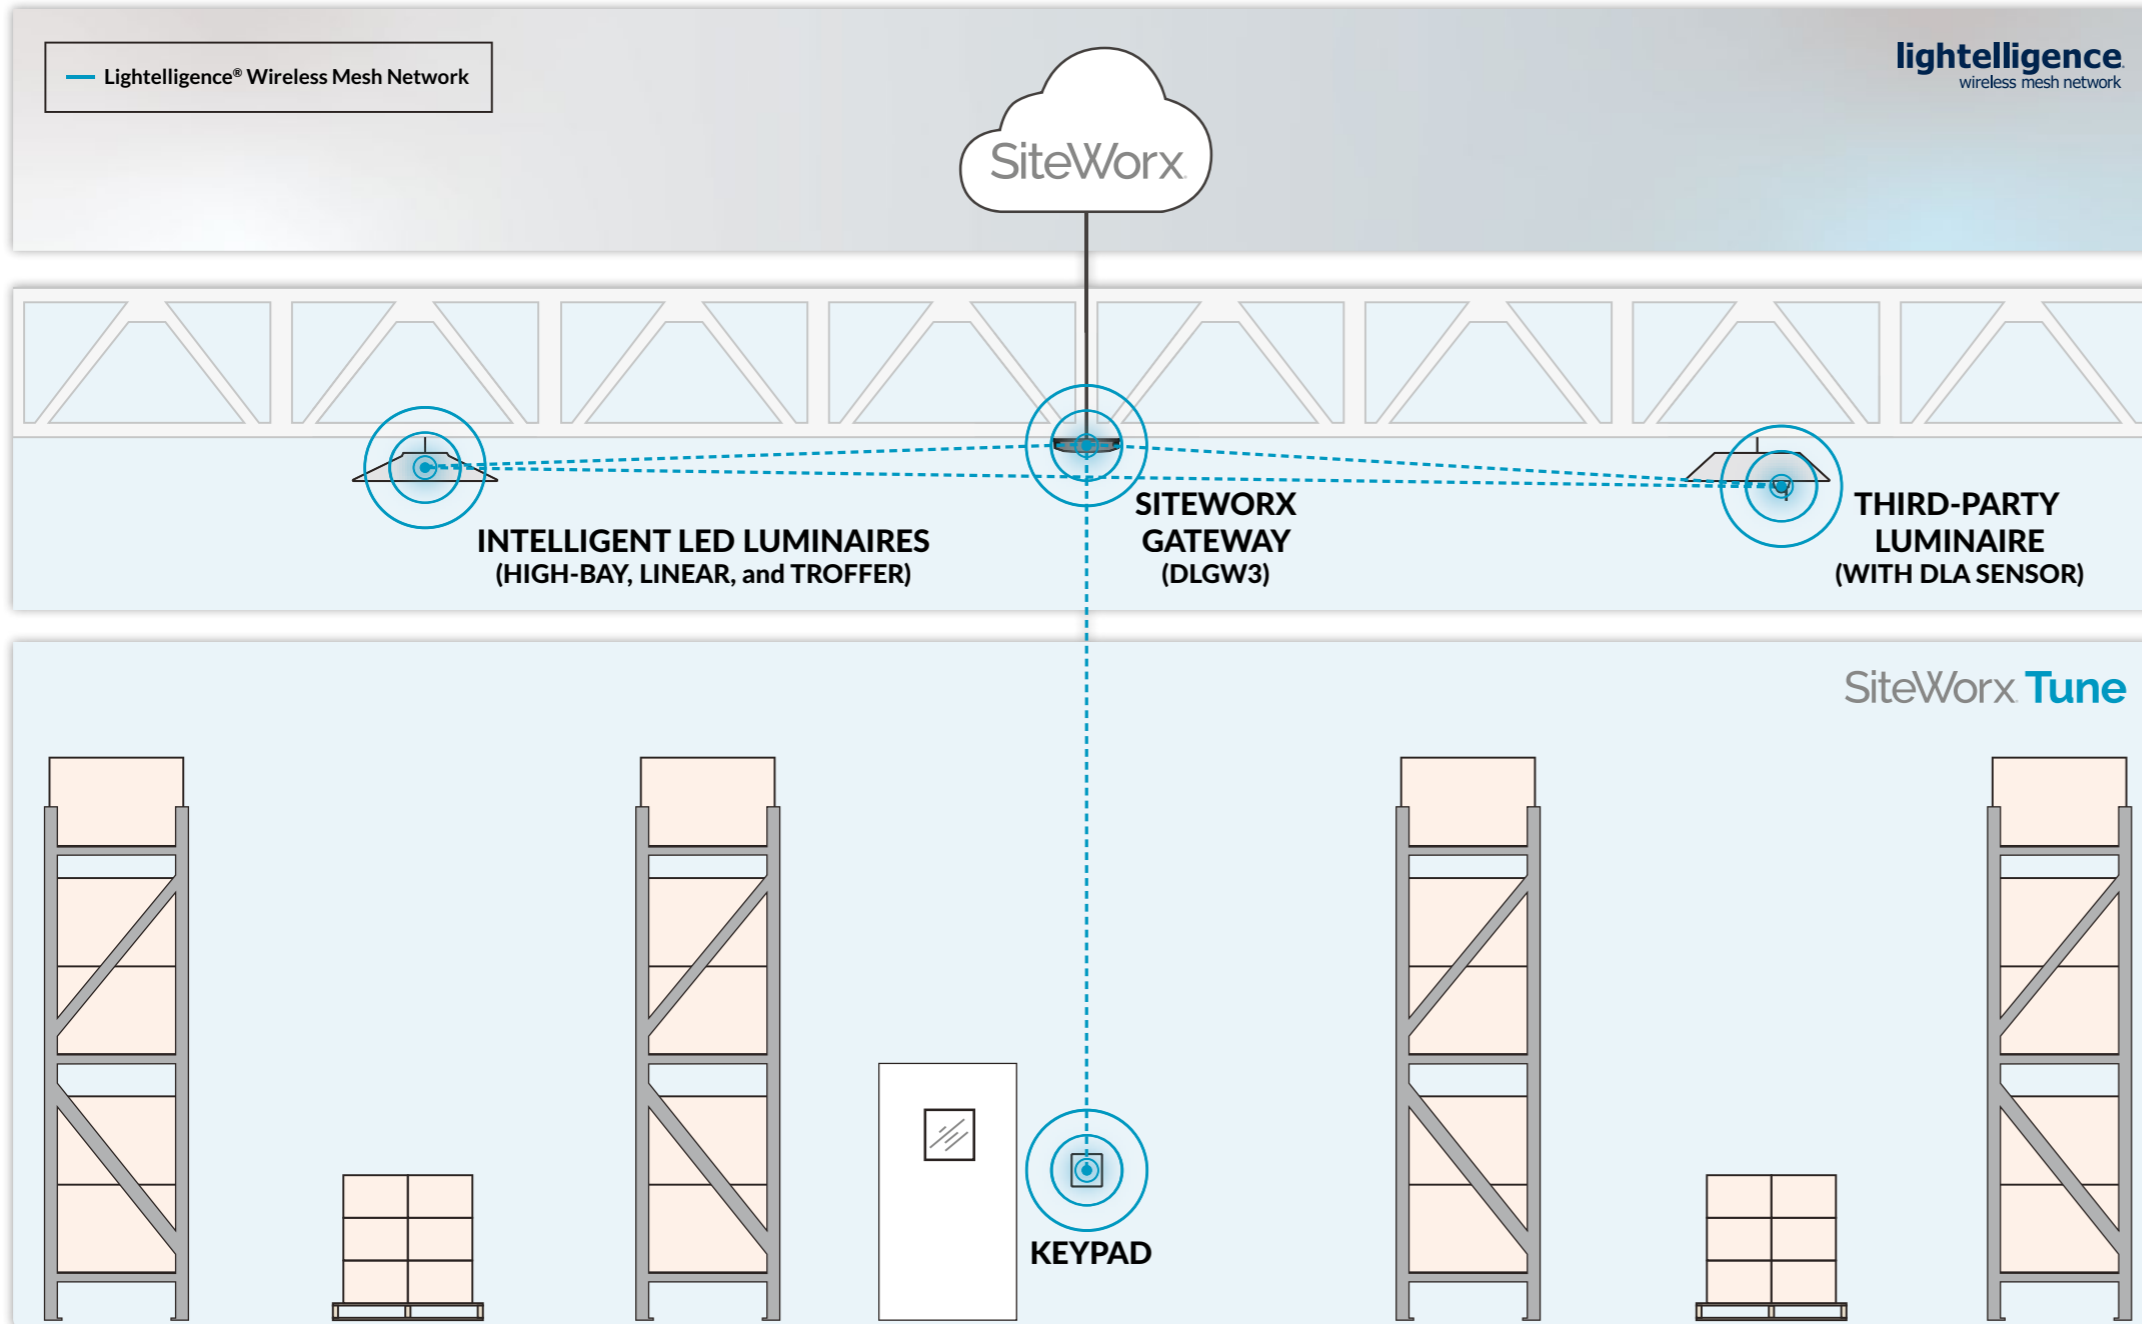

- **Test the reliability of your emergency lighting** with automated battery backup testing

Visualize Activity in Real-Time

- **See facility activity and lighting status** in real-time

How It Works

SiteWorx Tune includes all the key elements necessary to make major improvements to your lighting — from increasing comfort and safety to making impressive reductions in energy use. But unlike other solution providers, we keep it simple and nimble. And we take full advantage of your current investment in equipment, enabling you to leverage new value from it.

SiteWorx can support any combination of Digital Lumens luminaires and third-party luminaires (when paired with a DLA Sensor) to optimize, automate, control, and monitor the facility lighting system.

lightelligence.

Smart at the Core

No matter what SiteWorx application you choose, you can be sure that it's easily connected, completely secure, and simple to expand thanks to our Lightelligence core technology platform. Lightelligence provides a robust array of advanced capabilities that keep SiteWorx applications open, connected, and scalable — and easier to use, manage, and evolve. With Lightelligence, SiteWorx applications can be installed quickly and start delivering meaningful data and actionable insights right out of the box.

lightelligence.

wireless mesh network

The Lightelligence Wireless Mesh Network enables smart devices and luminaires to communicate seamlessly with the SiteWorx Facility Insight application suite. Based on the IEEE 802.15.4 Technical Standard, the Lightelligence Wireless Mesh Network is low-power, secure, and flexible.

Shown here is the Digital Lumens RLE Intelligent LED Luminaire integrated with a Lightelligence Sensing and Communications Module.

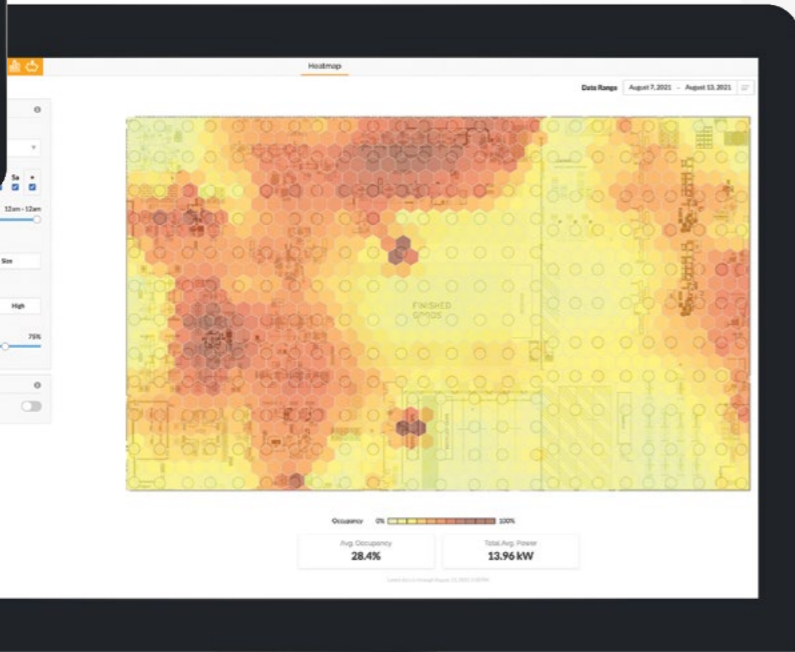

Digital Lumens equips its **Intelligent LED Luminaires** with the **Lightelligence Sensing and Communications Module** — an upgradable, future-proof solution to allow you to easily take advantage of new sensors and communication technologies as they become available while keeping current luminaires in place. The module is included with the CLE and RLE luminaire families and available for integration with third-party luminaires for seamless connection to SiteWorx.

Take a Closer Look at SiteWorx Tune

Here are just a few examples of what you'll see when you make SiteWorx Tune part of your facility:

Manage and Monitor Facility Changes

Manage lighting, monitor your facility, make changes, and view reports remotely — all from your tablet or mobile device.

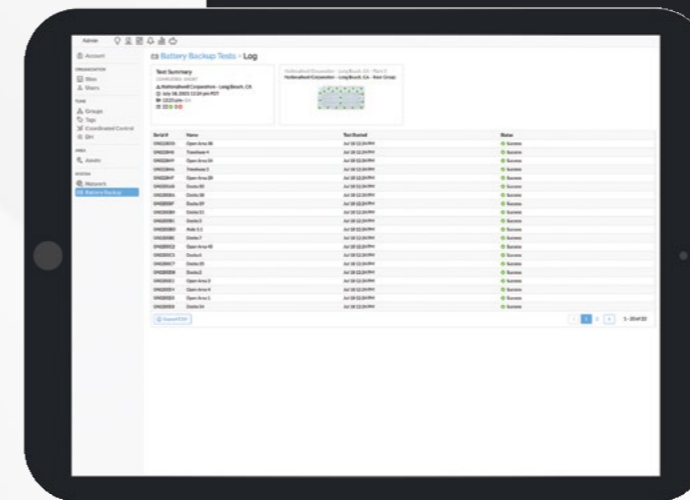

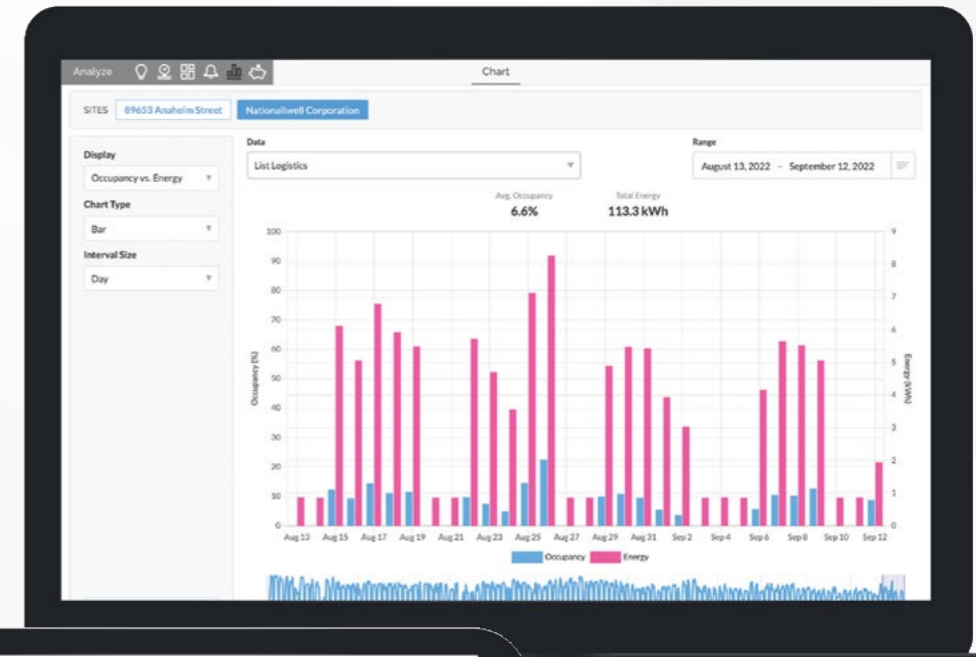

Understand Facility Patterns and Trends

Use occupancy data and heatmaps to understand facility traffic patterns and trends, create data-driven lighting setbacks, and much more.

Easy and Intuitive Reporting

The SiteWorx Tune dashboard and mobile applications make control, customization, and reporting easy and intuitive.

Perform and Schedule Emergency Battery and Battery Backup Testing

SiteWorx Tune makes it easy to perform emergency battery and battery backup testing, providing the clear record of testing required to comply with safety regulations for emergency lighting. No more time-consuming manual testing. You can even schedule the testing so it happens automatically.

SiteWorx Analyze

Examine and Understand Your Facility

An easy-to-use facility data visualization tool that gathers data from Intelligent LED Luminaires, Digital Lightelligence Agents, and SiteWorx Devices and Sensors — then presents it simply for data analysis and trend identification. Robust reporting capabilities give you new insight into your business operations, so you can increase productivity, maximize savings, reduce downtime, and improve business planning.

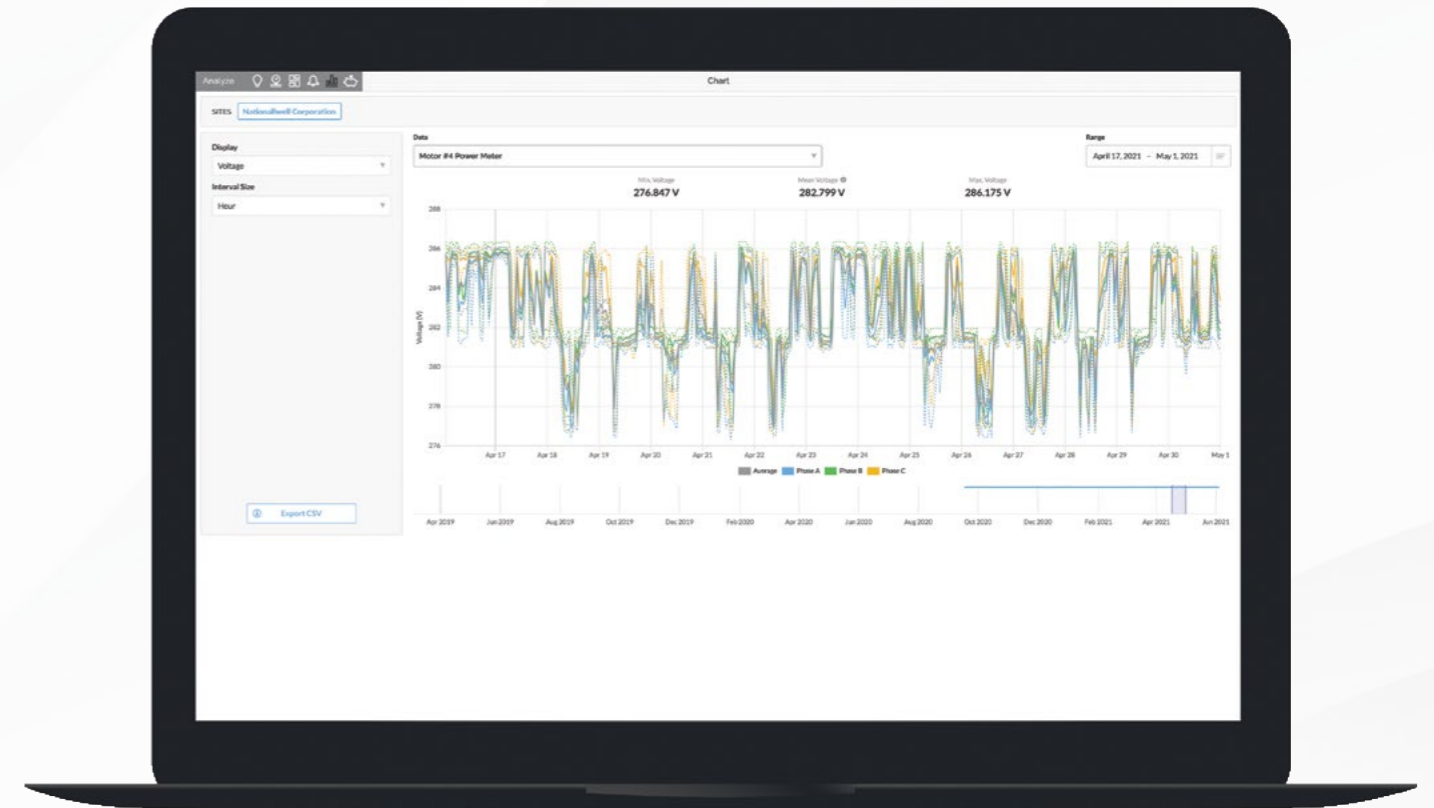

Get Focused Insights

Tag luminaires or sensor sources into reporting groups that pinpoint energy and utility consumption giving you clear insights on critical areas.

Create Custom Reports

Advanced but intuitive reporting makes it easy to select data sources, chart options, and date ranges — so you can zoom in, identify trends, and make decisions to keep your business running smoothly.

Validate Energy Savings

An easy-to-use savings dashboard lets you compare current energy savings with your lighting energy baseline, review facility energy use and trends, and see the Greenhouse Gas (GHG) reductions enabled by SiteWorx.

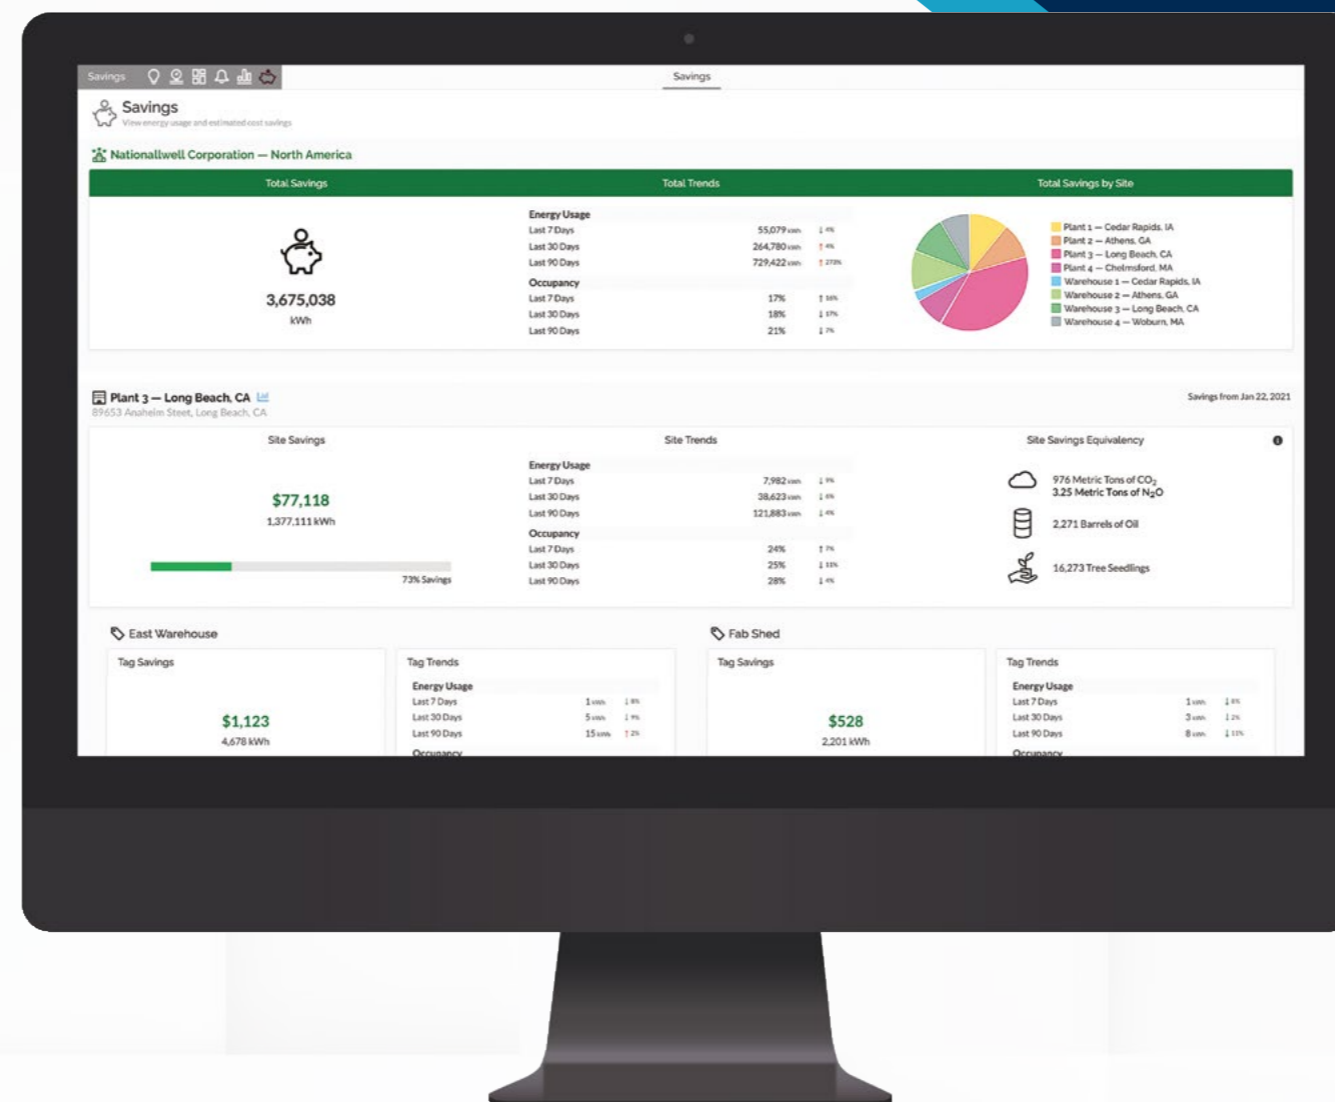

Gather Meaningful Facility Data

SiteWorx applications use a combination of intelligent lighting and smart devices to create a wireless mesh network throughout your facility, enabling secure, wireless communication of a wide range of facility data — including data on equipment operation, environmental conditions, occupancy, and more. Choose what and where you meter, monitor, and observe — putting key data and new operational insights in the hands of facility managers, sustainability officers, production line managers, and other key personnel.

All the Savings in One Place

SiteWorx Savings provides an easy to navigate "single pane of glass" experience, giving you all the important organizational savings details in one place. See real-time energy and financial savings across your entire organization at any time along with weekly, monthly, and quarterly trends to help identify achievements and areas for improvement.

Support Your Organizations Sustainability Goals

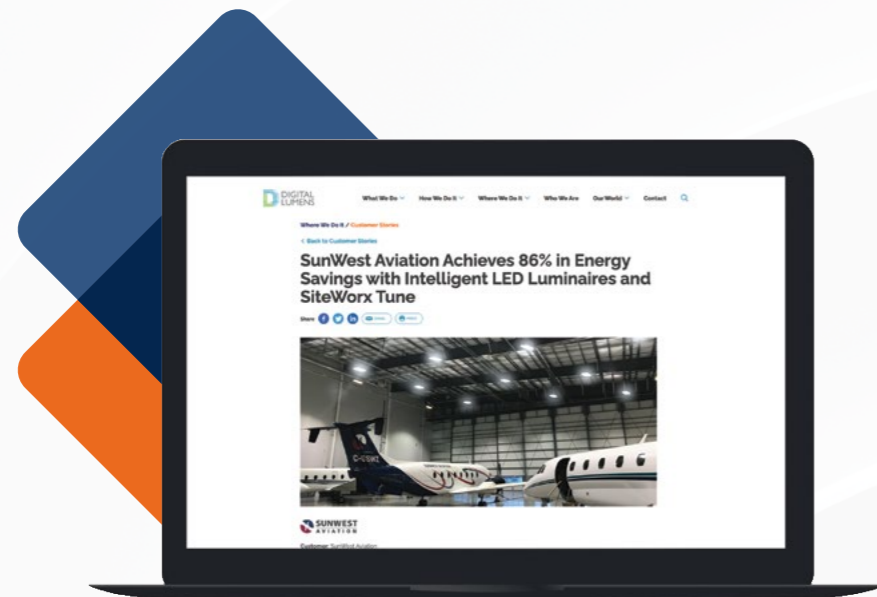

Track cumulative, real-time total savings and environmental impact of your LED lighting and advanced lighting controls. SiteWorx translates these savings to equivalents — the metric tons of CO₂ and N₂O emissions saved, barrels of oil not consumed, and tree seedlings grown for a decade.

Powerful Capabilities Today — Even More Ahead

Our subscription model delivers SiteWorx Tune as a service for a convenient, predictable annual fee. In addition, you will receive automatic software updates to bring you new capabilities that meet your evolving needs. Unlimited facilities, users, devices and data mean you never have to worry about restrictions. When you make SiteWorx part of your facility, you get great results and an impressive ROI right from the start — and a future-proof solution that delivers ongoing value to your business.

See What Our Customers Think

Our customers rely on us to make their facilities smarter, more efficient, safer, and more sustainable. But the specific details vary from site to site, since every facility is different. Every customer has a story to tell. Here are just some of them — intended to inform and inspire.

Make SiteWorx Tune Part of Your Facility

Find out more about how SiteWorx Tune brings new savings, control, automation, and more to your facility.

- Energy Savings**
 With SiteWorx Tune, you get the control it takes to reduce energy use, and the ability to record and chart your energy reductions — and savings — over time. SiteWorx gives you tangible proof of your progress toward meeting sustainability targets.
- Control**
 Workplaces are constantly evolving, with varying hours, shifting areas of activity, and other changes. Managers get the facility-level control they need to ensure efficiency, while employees get more control over lighting in their specific work areas.
- Comfort and Safety**
 SiteWorx Tune gives you capabilities you need to ensure comfort and safety under all conditions.
- Automation**
 SiteWorx Tune automates key changes — from dimming to take advantage of daylight to shutting off luminaires when they don't sense occupancy. It frees up facility personnel to take on other tasks, with the confidence that lighting is well-managed, efficient, and safe.

Explore the other SiteWorx applications — SiteWorx Area and SiteWorx Sense. And see how Facility Wellness can improve your facility and empower the people who work there.
